Real On-Device Cryptography You Own Outright — Never Held Hostage by a Monthly Cloud

Most vault apps either upload your private documents to a remote server or hold your own photos hostage behind a recurring paywall when you try to leave. notYours seals everything locally on your Android™ phone and guarantees free original-file export and open desktop recovery forever.

WHY PROFESSIONALS CHOOSE NOTYOURS OVER SUBSCRIPTION BLOATWARE

What Matters	Typical Cloud SaaS Tools	notYours™ Sovereign Standard
Pricing & Ownership	Recurring monthly or annual subscription rent	**✓ Free Core Forever · Optional One-Time Lifetime Unlock**
Data Custody	Uploads your files or activity to third-party servers	**✓ 100% local-first or in-account execution**
Login Friction	Mandatory account creation before first use	**✓ Zero sign-up walls · Works immediately after install**
Core Capability	Buried inside bloated multi-tab enterprise menus	**✓ Tactile 5x5 pattern grid supporting diagonal and knight-move paths plus one-tap Border & Travel Lockdown**

UP & RUNNING IN 60 SECONDS

1

Draw Your 5x5 Pattern (7+ Nodes)

Trace diagonal or knight-move paths across the 25-node grid. Check your live 2-color visual badge and confirm once to seal your vault.

2

Add Media, IDs, PDFs or Seed Words

Import via Android™ Photo Picker (zero gallery permissions), shoot in the Vault Camera, or type recovery phrases on the offline keypad.

3

Save a Portable .nyv Rescue Backup

Export an encrypted .nyv archive to a USB drive anytime — recoverable on Windows, macOS, or Linux via our open Python rescue script.

10-Second Travel Tip: Arm Border Lockdown Before Crossing Checkpoints: Inside Settings → Security → tap Border & Travel Lockdown to clear quick-unlock keys from memory and require full 5x5 pattern entry.
